

Demographics

The information included in this report is from the most recent Health and Wellness survey of this population and, overall, 611 students were surveyed. After controlling for invalid responses – omissions of the grade and gender information needed to compute within- and between-group comparisons – 546 respondent sets remained. The following table presents respondent characteristics by grade and gender. This information is the basis for the gender and grade breakdowns in this report.

Table 1.0 – Respondents by Gender and Grade

		Gender		Total
		Male	Female	
What grade are you in?	Grade 8	92	104	196
	Grade 9	90	80	170
	Grade 10	87	93	180
Total		269	277	546

Ninety-eight percent of respondents indicated they answered the questions honestly. However, only 46% indicated thinking their peers answered honestly.

What follows is the result of initial cross-tabulation:

Summary: User rates for synthetic marijuana cigarettes had the overall the lowest last 30 day use rates. Marijuana had the highest use rate, especially for the high school grades, with alcohol a close second. Females were more likely to have used alcohol while males were slightly more likely to use marijuana. Non medical use of prescription drugs was very balanced across all grades.

Peer Disapproval: % indicating they think their friends would consider the behavior
“wrong” and “very wrong”

Summary: Clearly perception of risk or harm decreases as students get older, especially for marijuana. Daily use of marijuana and of alcohol received higher rates of perceived risk than did weekly use. Use of synthetic marijuana was perceived as lower for weekly use than I would have expected.

SUMMARY: The table above suggests that as kids rise in grade, accessibility becomes easier for all substances. This is particularly true for alcohol and marijuana. Alcohol is most likely to be accessed at a party. Prescription drug access is relatively high for 10th graders.

Sources of Alcohol Reported by Those Identifying as Drinkers¹

Source	%
I got it from a friend (not at a party)	22.4%
I got it at a party where no adult was in the house	12.2%
I gave someone else money to buy it for me	11.2%
I got it at a party when an adult was in the house	11.2%
I got it from my parents/guardians home without their knowledge	10.2%
I got it from a sibling	7.1%
I got it from my parents/guardians home with their knowledge	5.1%
Other	4.1%
I bought it in a store, such as a liquor store	1.0%

Summary:

For those who reported using alcohol during the last 30 days, most reportedly got it from a friend, at a party or got someone to buy it for them.

Sources of Marijuana Reported by Those Identifying as Smokers

Source	%
I bought it from a friend or acquaintance	34.6%
I got it from a friend (not at a party)	22.4%
I gave someone else money to buy it for me	14.0%
I got it from a sibling or other family member	13.1%
I got it at a party when an adult was in the house	7.5%
